Safety, it's part of our NATURE

Mountain biking involves a certain amount of risk. In the great outdoors, preparation and prevention are the key to a safe and enjoyable experience. Put all the chances on your side; make safety your priority.

BEFORE YOU GO

- Mountain biking requires some notions and skills. Before your first ride, it is advisable to take a training course or invite an experienced rider to accompany you.
- Plan your excursion with the park's official map or Vélo Québec's trail directory.
- Choose an itinerary that suits your abilities and those of your fellow riders.
- Check the weather and trail conditions. Adjust your objectives accordingly.
- Dress appropriately for the season.
- Bring along the essentials: a means of communication, water and food, a trail map, a first aid kit, bike tools, and contingency supplies.
- Make sure your bike is in good condition. If in doubt, have it checked by a professional.
- Inform a close friend about your itinerary and its duration. This person will be your guardian angel and can notify emergency services should you go missing.
- Make sure you know the rules and regulations, and hours of operation. Get a pass at the park entrance or online.

WHEN OUT ON THE TRAILS

- Write down the emergency contact number and the procedure to follow when in areas without mobile phone coverage.
- Always wear an approved helmet designed for cycling.
- Stay on the trails at all times and obey the signs.
- At intersections, take the time to check your position and wait for your partners.
- Control your speed and keep a safe and respectful distance from other riders.
- Before passing another person, warn them of your presence and give them time to stop in a safe place.
- Before stopping, make sure no one is following close behind you, and pull over to the side of the trail to keep the path clear.
- Respect your limits. If a section appears to be too difficult, use the "chicken pass" or walk alongside your bike.
- Conserve your energy by taking regular breaks. Use this time to eat and drink.
- Leave early enough to complete your activity before dark or have the necessary equipment to remain safe after sunset.
- It is wiser not to set out by yourself.

WHEN YOU RETURN

- Let your guardian angel know once you are back.
- Let park staff know of any breakage or potentially dangerous areas observed during your visit.

RECOMMENDED EQUIPMENT

- Mountain bike (with knobby tires inflated to the recommended pressure and at least a front suspension)
- A properly fitting and certified mountain bike helmet
- O Gloves and elbow and knee pads
- O Closed shoes with an anti-slip tread
- Clothing suitable for the activity and season
